

This is an translation from Danish to English, poorly made of Google, and corrected by me.

"TOWARDS THE TRUTH" and Tage Winther

In my book "TOWARDS TRUTH" I write in particular about man and the universe originate, and the importance we have in relation to our Savior and Creator.

The book might be described as sensational as it offers the explanations and answers that nobody has been able to before. For anyone who loves the Bible is my book a key that opens the door to a whole new insight and understanding which enables us to understand the incredible love and care our Creator has for all people, good and evil. We all have our roots in the first Universe was created, and now we all live in a rebuilt Universe, created from the remains after the first. On Earth, our bodies were created this time of earthly elements, lethal parts, it happened when we departed us from love, and instead chose egoism destructive lifestyle, which was the cause of mankind's exclusion of the Universal Community. Now we live a lethal life on planet Earth, where we risk losing our perpetual existence, unless we give up selfishness.

In my book "TOWARDS TRUTH" I explain in particular about man and the universe originates, and the importance of our Savior and Creator has in relation to it, and we in Him.

The book might be described as sensational as it offers the explanations and answers that nobody has been able to before. For anyone who loves the Bible is my book a key that opens the door to a whole new insight and understanding which enables us to understand the incredible love and care our Creator has for all people, good and evil. We all have our roots in the first Universe been created, and now we all live in a rebuilt Universe, created from the remains after the first. On Earth, our bodies were created this time of earthly elements, lethal parts, it happened when we departed us from love, and instead chose egoism destructive lifestyle, which was the cause of mankind's exclusion of the Universal Community. Now we live a lethal life on planet Earth, where we risk losing our eternal existence, unless we give up selfishness.

At this moment I can't finance more expenses to translation, and if I let Google do the translation, the result become poor, but on the other hand you all need to know, the knowledge I have got from our Fathers and Saviours Holy Spirit.

My personal background

I was born in Jutland in 1942. When I was around 8 years old looked at my grandparent's illustrated Bible, I saw a picture of our Savior; I was completely overwhelmed by this vision. Later I tried to find the picture again, but strangely enough I could not find it again. My grandmother could not provide any explanation. At a later occasion, I reviewed every page of this thick book to see if a page had been torn out of the book, but all pages were intact. My grandmother had never seen this picture in the book and had no explanation for the phenomenon.

I had the best experience in my childhood when we lived in Bramming, a small town in Jutland Denmark. I was 11 years old and home alone on this spectacular day, I was very sad and lay on the sofa with down-turned face and wept. Suddenly dropped a huge white light down on me and filled me with enormous warmth and love. My Heavenly Father spoke to me with these words: "You must do the same for me as Jesus did."

I was totally overwhelmed and did not understand how this could be possible for little insignificant me. This event has marked my life; it made me so happy that nothing could later destroy my self esteem.

When I was about 16 I had a clear feeling that I came from another planet where there is only love, I found no love inside the church, so I took the consequence and left the church in the early twenties.

The only place I experienced love in my childhood was with my grandparents. Later in life was my father, my best friend, even later, my son Christian is also my best friend. In childhood I loved especially my grandfather, whom I grew up, I realized that the day would come when I lost him, but I wanted to be allowed to keep him for many years. Unfortunately I was only 16 years when I lost him. On my grandfather's death, I was on the way to visit my grandparents. Shortly before the city, in a turn, I suddenly knew that my grandfather had died. When I came out of the turn, I saw the flags waving in half from the church and into town.

In addition to these special experiences that I did not share with others, I lived an ordinary life until I was about 22 years. Since I started with that cast doubt on all the knowledge which had accumulated in my mortal brain. This knowledge was founded from early childhood and built in line with my upbringing, this knowledge led me, but I felt it was justified to test it, to doubt its truth. This process lasted for 3 days and it ended up that I

recognized that I basically knew nothing of real importance; it was a very painful process, which created a great emptiness inside me. On the third day the question arose in me: "Is there a Creator?" Since I was overjoyed, the question I could answer with 100% certainty: "Yes." The joy lasted only briefly, I realized the next moment, to my Creator, who had proved his existence to me when he spoke to me, eleven years old, but unhappy, I found myself totally out of this wonderful existence of the world, and a total emptiness filled me. I played Carambola and went a little later into the hall to see if a game might encourage me a little. Middle of the game, the miracle happened, a very thin beam of light hit me in the back of my head, I could see the beam, which informed me with a knowledge of unknown size, this knowledge have been a great help all my life, not least, many years later when I began to write a book that took me all of 7 years to complete. The books title is: "Towards the truth". The book mentioned on my website: www.yaohushua.dk.

Another even more spectacular experience I had shortly after my "enlightenment", I still lived in Copenhagen, where I had rented a room. One evening I was coming home, I began to think of death as I had done so many times before, both before and after my grandfather died. When these thoughts occurred to me always filled me with sorrow. In the past I would have rejected these ideas after a short while, but this evening I did not, in the minutes passed, I experienced death deeper and deeper while the death fear filled me, while I quietly observed the dreadful fear. A few minutes later I arrived to my room and went straight to bed, now the fear filled me completely. I knew with certainty that I would die unless I immediately left this confrontation, but I chose death rather than live a life of recurrent fear of death, but I had a very clear knowledge that the choice was mine, and I still could pull me out of the terrifying experience, but still I did not choose retreat. Following this decision, culminating in my death, I left the body from a place in back of my head, while all fears disappeared and I was filled with peace and love so indescribably wonderful. In the moment of death, I left the body, in which I was born and now I found myself in a completely different body, a body of an entirely different sort, I had eyes to see, as I lay on my back while I went up in the sky, laying on my back, where I found myself with the stars shining down on me. The experience was timeless I enjoyed it 100% without thinking a single thought, how long I found myself under the stars I do not know, but suddenly I slipped in through the back of the head again, where I lay for a while completely filled with the same peace and love until I fell asleep.

After this amazing experience I have never feared death, I saw, yes, we do not die when we leave the mortal body. I now understood the importance of people's reports of out-of-body experiences and near-death reports, where doctors and nurses attend patients who

die on the operating table, but surprisingly, comes alive again and tells of the things that happened while they were dead, interesting reports. I also understand the ressessionsterapeuter that bring their clients back before birth, to the point where we are going after death, yes, in some cases back to a series of previous lives, as I myself have several memories of. After this experience I understood that human life has a much larger perspective and context than the usual, we believe that we die when we die and then live on through our children. No, the truth is much more spectacular.

In the wake of the experience of the other side of death, I received a number of other educational experiences, but let me just go back to the morning when I wake up after my death and re-entered the body.

As I experienced myself as two separate identities, the one I knew before in my mortal body and the much greater spiritual identity, which I am in my immortal body, a strange split between which I can explain today, but did not understand then. If we can understand the concept of Spirit or Consciousness, which is our innermost identity, which detects all bodily experiences through the senses and brain, these experiences when passing through the senses and the brain on to our Spirit. It is the Spirit we are all our experiences ends through our bodily functions. Most of our spirit is connected with our immortal and current invisible body and the much smaller part of our Spirit is associated with our mortal body. After the death experience, I was again related to my eternal and immortal body and the much larger Spiritual part that is in it, and while the much smaller Spiritual part associated with the mortal body. This is the reason for this split between the experience identities. The day after I felt myself as two Spirits, but within a few days, my two-piece Spirit became one great Spirit. This new bigger Spirit gave me very extraordinary abilities, which made me able to perform the most incredible things. I knew what was inside other peoples mind, I was an unbelievably skilled communicator, I could determine that the Danish nuclear physicist Niels Bohr was right in a discussion of the theory of relativity, with Einstein. I prevented another human being committing murder. I got access to revive the farewell I had with my beloved grandfather just before he died when we were both crying, embracing each other while we say goodbye to each other. Memories from previous lives also appeared.

Now I will explain why our Spirit is divided in two, it happens right from our birth, where we begin to identify ourselves more and more with the new mortal body we incarnated into, and along with the knowledge we build up, we divide our spirit into two independent parts. This means that we are now in a very early age, completely disconnected from our true spiritual self and hence the amazing talents we have acquired us, since creation of the

universe in which we were created. Children who have not yet lost that connection provides the most incredible things we have plenty of examples, some talking unknown language and communicates with angels, or play and compose great music works, others will remember previous lives, we have many reports on these things which most do not, however, do not understand much of. I hope my experiences can inspire all who read this, to see their lives in a much broader scale than hitherto.

Another thing that happens when we incarnate in the mortal body, is that we provide it with the life of the Spirit we have in our eternal invisible body, it is this life force that keeps the mortal body alive, this particular body was made invisible by our Creator, of pure compassion, when we departed us from the universal rules, although we were warned that choosing a life of selfishness. It was a big mistake, which resulted in that we were made invisible and deported to the planet we live on. If not this rescue plan were implemented, would egoism long have exterminated humanity. On this earth, the new mortal bodies was created, so we life after life, could have the opportunity to rehabilitate us, and leave the fatal egoism and return to the life of love, only in this way we can be helped back to the life we left for so long time ago, which the Bible teaches us so much about. If we do, it means salvation, that we again become immortal when our eternal body again made visible. We lost our eternal life, not as a punishment, but only in this way was egoism deadly path stopped. Now I have explained a little about how things fit together, from the experiences I have had and the knowledge I got fed, but there is obviously much more to tell.

I want an abridged version of my book translated into many languages, maybe I use Google to do it, but the best for the whole world would be if there was made a movie of the book. There will be enough substance to an entire saga!

The film can be a revelation for all people on Earth. When they see it visualized and told.

Prior to beginning

is the time before the existence of Creation everything that proceeds, but only what relates to everything in the physical universe or the universe.

There is necessarily a reason for everything. Out of nothing is nothing able to be Created.

Apart from a simple human assessment of our own planet, we can probably all agree that it is tremendously well made and there certainly is something very fabulous behind its genesis. A large number of different sciences expresses concurrence that something

indefinable existence is behind the universe we live in. That it's all screwed together by chance exclude parts of science, with 100% certainty.

Conclusion

Something has thus created and put things together in a unique way, a kind of intelligence of enormous dimensions.

Before the beginning of the universe, is there anything that initiates early in his very first early beginnings, the same initiator provides and plan all natural ingredients interrelations, and build it further up until everything is finished.

This super creator I define as spirit, an indefinable Existence, which constructs a spiritual construction which is able to connect the appropriate quantities of the Spirit to any natural element, through sounds - vibrations, which determine all natural ingredients final construction. What we call the Spirit maintains the universe as individual parts in each of the state in which the sound oscillation established. I would describe word-sounds-vibrations are molds that adequate quantities of Spirit insists in their final form. How powerful forces Spirit contains, we include when we cleaves an atomic nucleus, a very harmful and unwise action. There are limitless energy resources all around us, just think of the enormous energy used to keep our heavy plane in a perfect orbit around the sun billions of years. Then think about energy quantities in a whole universe, as we have all 3 of the current resolution and recovery.

A physically perfect universe, where the presence of Spirit in all matter constantly adjusts the balance everywhere, even in the animal world different mutations, which are managed intelligently. Not just humanity's mistakes and foolish action, its negative consequences we suffer even under, even when the consequences mean our own destruction, for example in a nuclear war, which indeed may have implications for life on other planets.

When the Bible speaks of a Creator and that Creator created the universe by the word, so get the sense when we understand that the word is equal to sounds or vibrations, and that the cause of all natural sounds that come from something we call Spirit. An indefinable super intelligent Spiritual existence of an infinite powerhouse, with immense resources and intelligence at his disposal. An intelligence we ourselves are an integral part.

That the cause of handiwork beyond our comprehension is undeniable when we see how great the result has been that we are indeed only now, after thousands of years of existence, at the very bottom rung, at a very high recognition ladder.

Final:Before beginning, was the final outcome of Creation planned.

Beginning

Scientists believe that the "Big Bang", is the beginning of the Universe we know today, but it is really only a reconstruction of the remaining, as the very first consisted of the Universe. When a Universe ends its existence, and explodes as restored a similar new Universe again. The first Universal Restore is thus again completely equivalent First Universe. Thus life continued existence guaranteed by our Creator and Super formidable intellect, which is the prime mover behind the Creation; in perpetuity ensure mankind's existence. The impact of the Creation of human life and immortality, determine this creation of an additional Universal, which is ready for habitation and occupation before the first Universe perishes. Life is circulating among the following 3 Universes, 2 existing Universes while one is under reconstruction. A fact, as science now stands on the brink of recognizing.

In the Bible we read about the beginning, this beginning is described with the words: "In the beginning God created heaven and earth." In the next chapter Bible refers to the new restorations Universe and the Earth we live on, and an repetition Creation of mankind, this time entirely different, made of materials from this earth. Elsewhere in the Bible refers to another universe where the Creator lives with the people who are described as angels.

My conclusion is that right now exists 2 Universes, and a third Universe reconstruction, but it's probably already been fully operational for many thousand years ago. The Apostle Paul spoke of a man from this earth, who visited Universe 3, with the words: "The third heaven", he further says: If he travelled in the flesh or the Spirit, he knew not. This tells us, that people from here are able to travel ells where in our Universe, also it tells us we were visited by people from outer space. Many cultures reports of such visitors, throughout our earthly history, an undeniable fact.

They did, and still do, visited us in advanced spaceships, which are able to travel throughout the Creation, in a manner which will repeal our flawed conceptions of time and distance, but our science is moving closer to understand how it is possible.

The Bible is a fantastic book, which unfortunately has

been grossly massacred by people over the last 3 thousand years, they have reformulated the knowledge they received, and reproduced it in words as clearly bears the stamp of their ignorance.

Unfortunately, the Bible also been deliberately engineered by the negative and evil powers, who see their power advantages that we on this earth, believe that we are the only existing human beings in the universe and that all visitors from abroad come from an indefinable spiritual and not physical world.

Michael Cremo and Richard Thompson write in the book BANNED Archeology, about a 300 million year old human footprint, set in sand. Of course, people from outside also visited our earth in the distant past, of course; they follow the evolution throughout the Universe. This finding suggests that visitors from outside are natural people, also the Bible clearly defines them as such. Earth humans resulting egoism destructive forces, so we are not accepted in the Universal Community, unless we choose to abandon selfishness and return to the charity and love. This is what the Bible is about, it says that we once belonged to the heavenly community (Paradise, but that sin ruled us as we ate the fruit of the forbidden tree (selfishness), then we were physically removed and excluded, so here we are living in sin now isolated, with a Biblical message of salvation. The salvation which the Christian world preachers like idiots on their service based on the lies masquerading as truth. A contradiction which is easy to detect, from the very same Bible, which they falsely proclaim from, it shows in my book. Our Savior came into his father's name, therefore involves both the same name but the name is given in the Bible with different false names. The Father, Son and Holy Spirit bears the same name and this same name they proclaim not, nor they baptize the adults to this name, as they must do, for they know not the name. They baptize only babies by the ritual, to the Father, Son and Holy Spirit, Amen. Amen is the name of an Egyptian idol; they have another idol called Amen Ra. So grotesque performed the perform the baptism in the so-called Christian world churches.

The Holy Name

Since the Israeli high priests hidden the Father's name in the called Tetragrammaton YHWH, the only given name under heaven, to save us, was lost. The sound of this name, pronounced against the adult baptized, triggering the Holy Spirit's gift to the baptized, but this is not practiced in a false religion. The sound of the lost

redemptive name must be found and used in the Christian world. Their adultery must return to the truth. Audio and sounds are vibrations that affect their lives, these sounds in the form of thoughts and words create the reality we all live in, and especially it affects ourselves. Sounds are creative tools that we affect our body and each other, therefore their contents determine the conditions we experience in ourselves and between each other. Any spoken word or idea we think are creative tools that we can use in egoism or love, two different tools to use, having different impact on our life. Thus, we are bound by selfishness negative thoughts and the consequences of their effect on the way; we can determine our world negative mode. In the service of love using those thoughts and words, our own body benefit of such healing thoughts and words, just as our surroundings also do. In this simple way we are changing our world from evil to good. Thoughts and spoken word sound activates the reality they refer, they create immediate feelings in us, either good or evil. The power or energy that fills our thoughts and words, come from our spirit and the meaning of persuasive power we put in our thoughts and spoken word determines efficiency. A simple process that must be researched and developed to benefit all people is simply a vital role for society and all societies around the world.

The written word translated into thoughts and spoken word, thus rising tools, and determines our own and other's future, good or bad. These positive or negative used tools, we have learned the importance of, nothing is more important for the Earth's people, for we surely want everyone to have a future and I think we all want access to the best possible future, whether we are present egoists or predominantly characterized by positive and loving thoughts. Yes we are all on this earth in learning so that we can develop this knowledge in the best way. End of this little treatise.

Baptism

Until we know by sure, The Holy Name of the Father, Son and Holy Spirit, I recommend all adults to baptize each other to YAH, a very close name, if not the only true Name. Do it, remove the evil baptism, away from your body and Spirit, with the baptism to YAH. Do not add, his title to the name, because a title never can become a part of a name. The similarly titles in the Old and New Testament is Ha Wah and Shua, but they are not possible

to use in baptism. Every human loving our Saviour YAH is
intitled to perform a baptism.
When we again know the written and spoken name, with the
correct given sound, we repeat the baptism again.

With my Love to all.

Your brother from Heaven and Earth

Tage Winther
